

Scott Caulfield | Lead Education Consultant Implementation & Integration Offerings

Transform your Lessons for the 21st Century Learner

Within the context of a digital lesson using an interactive whiteboard and voting system, come see how to transform your basic lessons into an extraordinary learning experience for today's 21st century learner. Using Promethean's ActivInspire software along with the Activboard and ActivExpressions, participants will learn how to use all the features available to them so they can create a 21st century lesson that will be interactive and engage all learning styles.

Applying Higher Level Thinking Skills to Student Response Systems

Come see how formative assessment can be used effectively in the classroom environment. Using Promethean's ActivInspire software along with the ActivBoard and ActivExpressions, teachers can bring voting beyond the standard summative assessment questioning strategies and improve student achievement while promoting higher order thinking.

Top 10 Free Websites & Programs to use with your Interactive Board & LRS

In this session learn how to use 10 free websites and programs that enhance your Interactive Whiteboard or Student Response Device. You will not only see these websites and programs, but learn how to use them with your existing classroom technology to engage your students and foster higher level thinking.

Applying Higher Level Thinking Skills to iPads and BYOD

The next movement in technology is Bring Your Own Device (BYOD), in which students bring their own devices into the classroom as tools. Come see how formative assessment can be used effectively within this new classroom environment. Using Promethean's ActivEngage Mobile, teachers can begin to leverage students' devices for higher order thinking and use them as a tool to improve student achievement and engagement.

Successfully Implementing iPads

Angry Birds, Plants vs Zombies, and Flight Control are not the reasons that you implemented iPads in your classroom. In this session learn how to utilize the iPad as a learning response device to promote higher order thinking skills and improve student achievement and engagement. We will also review some of the best apps to use in the classroom and how you can utilize them so students are using the iPad to collaborate and interact with your curriculum and not as an Angry Birds game platform.

What Makes a Good Flipchart?

What makes a good flipchart? Attendees will explore lesson design strategies that enhance flipcharts and support teaching and learning across the curriculum. Seven strategies will be presented and will include student interactivity, formative assessment, page design, student-directed activities, and so much more. These simple strategies will not only make your flipcharts good...they'll be GREAT!

Higher Order Thinking in the ActivClassroom

As educators, we are all familiar with Benjamin Bloom's classification of learning objectives and the higher order thinking skills that accompany those objectives. This session will examine how easily Bloom's learning objectives and higher order thinking skills can be incorporated into the ActivClassroom. We will explore developmentally appropriate learning opportunities that address Bloom's Taxonomy and Higher Order Thinking Skills, and support teaching and learning throughout all content areas and grade levels.

ActivClassroom Awareness for Administrators and School Leaders

The ActivClassroom Awareness Session for Administrators and School Leaders examines best practices and provides a peek into an ideal ActivClassroom through developmentally appropriate learning opportunities and technology-enhanced instructional strategies that support the diverse needs of learners. Administrators and others in leadership roles will learn how to effectively monitor ActivClassroom proficiency and usage to help ensure that the technology is being used appropriately to maximize student learning and engagement in the classroom.

ActivTips Top 10

Learn why you should be a fan of the Promethean Planet podcast ActivTips. Are you already a fan? This is your chance to work with the creator and voice behind the ActivTips. Scott will reveal his top 10 tips to make lessons more engaging and to get the most out of your ActivClassroom. You will also be able to submit your own ideas for future ActivTips and be part of creating a future ActivTip! Whether you are new to Promethean or have been using it for years, you're sure to learn something new!

Formative Assessment in the ActivClassroom

Explore the world of formative assessment and learn how to create opportunities for formative assessment in any classroom using Activotes, ActivExpression and/or ActivEngage. Attendees will learn how to use the 1.6 Question Manager, create Self-Paced Assessments, and so much more. When used properly, these formative assessment opportunities are sure to make an impact on student achievement!

Effective Flipchart Design

There more to an effective Flipchart than just the content. Explore how the elements of design, such as color, font, and layout make a huge difference in conveying your message, and discover how to create an amazingly effective presentation and flipchart.

Build a Better Flipchart

Bring your laptop & curriculum to this session. Not only learn a few ways to make your flipcharts more interactive, but spend some time with a Promethean Education Consultant and your peers, working on YOUR flipcharts to take them to the next level!

The Power of Media in the ActivClassroom

We live in a media-rich environment full of music, videos, photos, etc. Students have come to expect this media in all facets of life, so it is important for educators to capitalize on this medium for instructional purposes. The Promethean ActivClassroom makes media integration easy, and this session will explore how and why to include media in lessons. Appropriate media has an amazing power to motivate students and enhance instruction.

Listen Up : How Music Can Transform Everyday Lessons

What can Bob Dylan, Buddy Holly and Aaliyah teach you about student engagement? Come see how music can transform your basic lessons into an extraordinary learning experience for today's 21st learner. Using Promethean's ActivInspire software along with the ActivBoard, ActiExpressions and ActivSound, participants will learn how to music can create a 21st century lesson that will be interactive and engage all learning styles.

Using BrainPOP & Promethean for Higher Level Thinking

What's more fun than BrainPOP's Moby? Moby using a Promethean ActivExpression! Teachers will learn how to bring voting beyond the standard summative assessment questioning strategies and improve student achievement while promoting higher order thinking using a combination of tools provided by Promethean & BrainPOP.

These are only examples of possible offerings. If there is a specific need, I would be more than happy to work with you to develop a customized session. Please contact Scott Caulfield (@EdTechScott) at scott.caulfield@prometheanworld.com or 317.702.5723.
